EPDM Product on Courts

The Town of Drayton Valley is requesting information from municipalities on the application of EPDM product on tennis and pickleball courts. Specifically, the Town of Drayton Valley wishes to know if EPDM product is suited for tennis and pickleball courts. The Town is presented with a surface that needs to be levelled with an appropriate material before the final paint coat is applied (the surface is over a water reservoir and cannot allow paving equipment as there is a weight restriction). If anyone has information that can assist the Town of Drayton Valley, please call the individual noted below.
