## SUPPLIERS GUIDE

2022

# about

## THE GUIDE

---

This guide is a collaboration between the Alberta Recreation and Parks Association and the Alberta Association of Recreation Facility Personnel. It's meant to be a resource for members of both associations, parks and recreation facility management, and municipal recreation departments throughout the province.

### **Alberta Recreation and Parks Association**

ARPA is a not-for-profit organization committed to building healthier and happier communities and citizens by developing and promoting recreation and parks.

We believe recreation and parks include everything from play and sport to arts, culture and outdoor pursuits. All are essential for creating beautiful and thriving communities that foster healthy and happy citizens.

[www.arpaonline.ca](http://www.arpaonline.ca)

### **Alberta Association of Recreation Facility Personnel**

AARFP is a not-for-profit association committed to providing education, consultation and advocacy in recreation facility operations.

The Association provides arena, pool, parks and sport fields, custodial, building maintenance and leadership courses, conferences and seminars.

## GLOBAL AQUATIC SOLUTIONS

**Pinnacle Aquatic Group Inc.** brings "Global Aquatic Solutions" to the commercial swimming pool and spa industry.

**Introducing the Hypolyser Electrochlorination System.** Offering a safer, cleaner and more environmentally friendly way to provide chlorine for a wide range of disinfection uses. Using only salt, water and electricity to produce sodium hypochlorite, each Hypolyser model offers exactly the same quality of performance and benefits. Whether you are looking to disinfect a single pool, spa or multiple bodies of water, a single Hypolyser is all you need. A single unit is capable of providing enough chlorine to treat millions of litres of water per day. There's a Hypolyser system available to perfectly fit your needs. Hypolyser is PCP registered.

### **S2 Architecture**

[www.s2architecture.com](http://www.s2architecture.com) | [communications@s2architecture.com](mailto:communications@s2architecture.com) | ph: 403-670-7000  
6th Floor, 220 - 12 Avenue SW, Calgary, AB T2R 0E9

S2 Architecture provides full service architectural, interior design, and master planning services across Western Canada. We take pride in our collaborative and inclusive approach to create spaces for people that support wellbeing, cultivate community, uphold sustainable design, and provide purposeful environments for working, living, and playing.

Our 28-year history includes work across a broad range of building and project types, and the foundation of our success is deeply rooted in the value we place on our relationships.

We are proud of our extensive work in the recreational sector, having completed more than 45 sports and recreation projects throughout Alberta and more than 50 assessments for City of Calgary Recreation. Our value comes from our familiarity with all facets of recreation projects – engagement with stakeholders, user and equipment requirements, municipal bylaws, parking considerations, access and egress needs, relocation of existing services, interconnection of new systems to the existing building, minimizing impact on users in existing spaces, and operational needs. We are passionate about community building and bettering the lives of citizens through sports and recreation. Our team understands the planning and design complexities of recreation projects, particularly ones that need to remain operational during renovations, and we have proven capacity to provide design solutions in a collaborative, thoughtful and creative manner.

With studios in Calgary, Edmonton, and Vancouver, S2 is led by six partners who bring their individual talents and expertise to each project, and who are committed to shaping the built environment of our communities – collaboratively, creatively, and sustainably. Our team brings energy, passion and a spirit of togetherness to every project.

Swish Maintenance Limited is a leading-edge distributor of innovative sanitation solutions and equipment in Canada. With innovative technologies and processes, we empower our customers to run their businesses more efficiently while also providing training, servicing, and technical processes that exceed their expectations.

Privately owned and operated, Swish has the financial stability, infrastructure, and experience to exceed our customer's requirements. We possess extensive knowledge of the many industries we service, particularly long-term care and retirement organizations, which is why we have gained our reputation as experts.

As a solid and knowledgeable leader in the Canadian sanitation industry, we have aligned ourselves with the best-in-class suppliers. We are committed to delivering excellent quality products and exemplary service while being mindful of our environmental responsibility and the need for a commitment to a better tomorrow. For over 65 years, we have worked to focus our efforts toward a more sustainable future by introducing innovations in product and technological advancements. Swish is proud to say that they have been practicing this commitment to sustainability long before it became a mainstream societal trend.

# Recreation Facility Management

The Recreation Facility Management Certificate program was developed in partnership between Red Deer Polytechnic and the Alberta Association of Recreation Facility Personnel (AARFP) to deliver technical and management skills specific to the recreation industry for current and aspiring supervisors and managers.

The Management Skills for Supervisors Certificate through Red Deer Polytechnic provides the theory and skills to build management capacity. After completing this certificate, you will recognize your style of management, be able to manage difficult situations and create efficiencies that will aid your patrons and your team and enhance the bottom line. At the same time, the technical training for facility operations offered by the AARFP will help you develop a comprehensive understanding of recreational facility operations.

It's a one stop shop for Managed IT and Digital Signage.

## REALice Canada

[www.realice.ca](http://www.realice.ca) | [info@realice.ca](mailto:info@realice.ca) | ph: 1-888-542-9292  
303 - 1210 W8th Avenue, Vancouver, BC V6H 3Y9

Key Benefits: Excellent ice quality, energy, and money savings. REALice is an easy install retrofit technology for ice arenas to make great ice with cold/ambient temperature flood water. Not having to heat up the floodwater, operators reset brine temperatures up by 3°F - 5°F, saving more energy. The use of unheated water produces less evaporation, easing the load on the dehumidification systems. Funding may be available from Fortis Alberta, the Federation of Canadian Municipalities, or others. Connect with other operators from Alberta using the REALice system by joining the conversation on our Facebook group: <https://www.facebook.com/groups/operationscentralrealice> or watch any of our Operator 2 Operator videos: <https://tinyurl.com/operator2operator>

## COURSE LISTINGS

---

The following courses are available through the Alberta Association of Recreation Facility Personnel (AARFP). To register for courses online, visit [www.aarfp.com](http://www.aarfp.com).

An AARFP membership is required to attend AARFP courses. Payment must be received one week prior to starting the course.

### Arena Operator Level I

This course consists of both classroom instruction and practical sessions, regarding the making, marking, painting and maintenance of artificial ice surfaces. Students will also be introduced to basic refrigeration theory. Participants are encouraged to bring warm clothing as time will be spent on the ice surface. RFP also recommends students wear a CSA approved hockey helmet for on-ice components. **Successful candidates will receive the Arena Operator Level 1 Certificate.**

### Arena Operator Level II

Prerequisite: Arena Operator Level 1. This intensive course covers advanced instruction in refrigeration theory, ice plant operations, maintenance and troubleshooting, facility operations, and safety. Participants must bring a highlighter and calculator. **Successful candidates will receive the Arena Operator Level 2 Certificate.**

### Arena Maintenance

This course is ideal for the frontline, grass roots arena operator who is looking to upgrade their skills in ice facility operations. The following areas will be covered in this course: changing the blade and levelling, preventative maintenance on the resurfacer, safety concerns, proper shaving techniques, proper flooding techniques, proper use of an edger, hand edging, line repairs, board repairs, changing glass, and janitorial concerns. Participants are encouraged to bring warm clothing and a CSA approved hockey helmet for on-ice sessions. **Successful candidates will receive the Arena Maintenance Certificate.**

### Ball Diamond Construction

Properly laid out and constructed ball fields are paramount to the game. Whether it is a regulation ball field or for recreational type of play, proper construction is crucial. Knowing the basics prior to construction is necessary before you can build your own field. This course is designed to help set up a field from a relatively level, open area of ground to its completion. Whether you are going to build a ball diamond from scratch or are getting involved later in the process, you'll find this course valuable. **Successful candidates will receive the Ball Diamond Construction Certificate.**

# aarfp

## COURSE LISTINGS

---

### **Building Maintenance Level 1**

This two-day course covers these areas of facility operation: preventive maintenance, life cycle planning, thermodynamics, HVAC / boiler operation and mechanical maintenance, basic carpentry, painting, basic electricity, plumbing, and facility safety. **Participants will receive the Building Maintenance Level 1 Certificate.**

### **Building Maintenance Level II**

Prerequisite: Building Maintenance Level I. This is the second part to the popular Level 1 program. You will learn about a facility's building envelope, facility layout, energy management, control systems, pumps, belts, lubrication and electric motors, fire suppression, and working alone. **Successful candidates will receive the Building Maintenance Level 2 Certificate.**

### **Custodial Care**

The first thing your customers notice about your facility is its appearance. This course goes through the basics of proper custodial maintenance and the importance of a clean facility. Emphasis will be on proper product usage and safety. New products will be discussed as well as tips and tricks of the trade. **Successful candidates will receive a Custodial Care Certificate.**

### **Developing a Policy and Procedure Manual**

This program is designed to assist communities and community groups to develop a policy and procedure manual for all types of facilities. In the one-day course, participants will learn how to start the policy and procedure manual, what should be included, and how to keep it current. Some areas that will be covered are facility regulations, administrative procedures, financial and staff management, emergency procedures, programming, and scheduling. **Successful candidates will receive a Developing a Policy and Procedure Manual Certificate.**

### **Leadership Skills**

This three-day course is designed to give practical ideas and skills for those in leadership roles. The focus will be how to become a better team leader. Participants will learn the aspects of effective leadership including managing yourself, work, and situations. Participants will also learn tips to deal effectively with people and handle negative situations. **Successful candidates will receive a Leadership Skills Certificate.** Course is available both in-class and online.

# aarfp

## COURSE LISTINGS

---

### **Lifecycle/Risk Management**

This one-day course is designed to assist operators in the basic preparation and implementation of a lifecycle document and to better understand the importance of a solid risk management program for their facilities. **Successful candidates will receive the Lifecycle/Risk Management certificate.**

### **Natural Ice Making**

This course is offered to participants that want to know the best methods for putting in a sheet of natural ice. Instruction will include a hands-on component, if possible, but it will depend on weather conditions. Students should dress warmly for this course, and RFP encourages students to wear a CSA approved hockey helmet for on-ice sessions. NOTE: Natural Ice Making courses in Lake Louise will have students along with the instructor installing all lines, circles, creases, etc. **Successful candidates will receive a Natural Ice Making Certificate.**

### **Parks & Sport Fields Level I**

This two-day long course will enable the participants to be involved with hands-on and in class components. It will focus on parks and sport fields, grass types and turf management, irrigation, ball diamond construction, ball diamond specialty maintenance, weed and pest control. Community gardens, equipment maintenance, public relations and safety will also be reviewed. RFP suggests that students wear suitable, outdoor clothing, as time will be spent outdoors measuring and marking out ball diamonds along with other facility tours. **Successful candidates will receive a Parks and Sport Fields Operator Level 1 Certificate.**

### **Parks & Sport Fields Level II**

Prerequisite: Parks and Sport Fields Level 1. This two-day course includes hands-on and in class components. Content includes plant beds and hanging baskets, soil tests, landscaping, composting, vandalism, pruning and tree planting, trails, campgrounds, by-laws and project management, skateboard parks and dog parks. Students should wear suitable clothing, as time will be spent outdoors doing group work and facility tours. **Successful candidates will receive the Parks and Sport fields Operator Level 2 Certificate.**

### **Swimming Pool Operator Level 1**

This workshop provides a rigorous in-class and hands-on experience for those involved in swimming pool operations. Topics include water circulation/filtration, basic chlorine and saltwater chemistry, water balance, pool diseases and water testing. This course has been updated to meet Alberta Health and Wellness Standards. Participants should also bring a calculator for class and exam. **Successful candidates will receive the Swimming Pool Operator Level 1 Certificate.** Course is available both in-class and online.

## COURSE LISTINGS

---

### **Swimming Pool Operator Level 2**

Prerequisite: Swimming Pool Operator Level 1 or equivalent. The Swimming Pool Operator Course (Level 2) information builds on the material presented at the certified Swimming Pool Operator Level I Course. Participants will learn to deal with more complex problems as swimming pool operators. Topics include water clarity, air quality, health of swimming pool water, diseases, pools and Spas, oxidation reduction potential/controllers, circulation, specialty chemicals, energy management, steam rooms and saunas, risk management, custodial management, and lifecycle and preventive maintenance. You will be required to complete a group project, and a take-home final exam. NOTE: After Class and Evening work will be required! **Successful candidates will receive a Swimming Pool Operator Level 2 Certificate.**
